AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings of claims in the application:

Claim 1 (Currently Amended): A process for producing foamable crosslinked polymers, comprising:

polymerizing a mixture comprising

- (A) 30-70 parts by weight of methacrylic acid (meth)acrylic acid,
 30-60 parts by weight of methacrylonitrile (meth)acrylonitrile,
 0-30 parts by weight of other monomers having vinyl unsaturation,
- (B) 0.01-15 parts by weight of tert-butyl methacrylate,
- (C) 0.01-10 parts by weight of blowing agent,
- (D) 0.01-10 parts by weight of crosslinking agent,
- (E) 0.01 to 2 parts by weight of polymerization initiators and
- (F) 0 to 20 parts by weight of conventional additives

in bulk to give a sheet;

wherein said sheet is optionally subjected to the following treatment:

heat-conditioning and then foaming at temperatures of from 150 to 250°C.

Claim 2 (Previously Presented): The process for producing foamable crosslinked polymers according to Claim 1, wherein 0.01-4.99 parts by weight of tert-butyl methacrylate are used.

Claim 3 (Currently Amended): A foamable crosslinked polymer comprising

(A) 30-70 parts by weight of methacrylic acid (meth)acrylic acid,

Application No.: 10/577,815

Reply to Office Action of: April 12, 2010

30-60 parts by weight of methacrylonitrile (meth)acrylonitrile, 0-30 parts by weight of other monomers having vinyl unsaturation,

- (B) 0.01-15 parts by weight of tert-butyl methacrylate,
- (C) 0.01-10 parts by weight of blowing agent,
- (D) 0.01-10 parts by weight of crosslinking agent,
- (E) 0.01 to 2 parts by weight of polymerization initiators and
- (F) 0 to 20 parts by weight of conventional additives.

Claim 4 (Previously Presented): The foamable crosslinked polymer according to Claim 3, wherein the polymer comprises 0.01-4.99 parts by weight of tert-butyl methacrylate.

Claim 5 (Previously Presented): A poly(meth)acrylimide foam, wherein the poly(meth)acrylimide foam is obtained via foaming of polymer according to the process of Claim 1.

Claim 6 (Previously Presented): A laminated material comprising a layer of a poly(meth)acrylimide foam according to Claim 5.

Claim 7 (Previously Presented): A vehicle, comprising:

the poly(meth)acrylimide foam according to Claim 5;

wherein said vehicle is selected from the group consisting of a motor vehicle, a rail vehicle, a watercraft, an aircraft or a spacecraft.

Claim 8 (Previously Presented): A machine component comprising the poly(meth)acrylimide foam according to Claim 5.

Application No.: 10/577,815

Reply to Office Action of: April 12, 2010

Claim 9 (Previously Presented): An antenna comprising the poly(meth)acrylimide foam according to Claim 5.

Claim 10 (Previously Presented): An X-ray table comprising the poly(meth)acrylimide foam according to Claim 5.

Claim 11 (Previously Presented): A loudspeaker comprising the poly(meth)acrylimide foam according to Claim 5.

Claim 12 (Previously Presented): A pipe comprising the poly(meth)acrylimide foam according to Claim 5.

Claim 13 (Previously Presented): The process for producing foamable crosslinked polymers according to Claim 1, wherein said sheet is heat-conditioned and foamed.

Claims 14-15 (Canceled):

Claim 16 (Previously Presented): The process for producing foamable crosslinked polymers according to Claim 1, wherein 1 to 10 parts by weight of tert-butyl methacrylate are used.

Application No.: 10/577,815 Reply to Office Action of: April 12, 2010

Claim 17 (Currently Amended): The process for producing foamable crosslinked

polymers polymer according to Claim 3, wherein 1 to 10 parts by weight of tert-butyl

methacrylate are used.

Claims 18-19 (Canceled):

5
